

IMPORTANT

Your Ferris Cat Wheel Grand Ferris has been designed to be safe, solid and sturdy. Optimum performance and safety of your Ferris Cat Wheel Grand Ferris requires attention to specific details and areas of concern. Please use this info when considering the best spot in your home for safe placement of your new wheel.

Cat wheel placement

The wheel purchaser is responsible for siting the cat wheel on a suitable level surface away from hazards, allowing sufficient free space around wheel so as not to introduce a pinch hazard between the moving wheel and a surface.

Avoid placing the cat wheel near to any climbable object such as cat tree, furniture, wall shelves etc. To prevent the cats from jumping and landing on the very top of the cat wheel causing tipping hazard to the wheel.

Avoid placing the cat wheel outdoor, to prevent UV degradation of plastic parts by exposure to sunlight.

Supervision of young children and pets

Keep out of reach of children, larger pets, or any moving object with the force strong enough to cause the falling of cat wheel. In order to avoid injury or damage of properties around the cat wheel.

The cat wheel is designed for adult cats. Use by kittens is at the owners risk and must be under supervision only. We also strongly discourage allowing kittens and adults to use the wheel at the same time.

Pinch hazard, keep clear of spinning skate wheels.

Ferris cat wheel wish to advise that, although every attempt has been incorporated in the design to prevent access to the skate wheels, inquisitive pets may still wish to investigate, it is the owner's responsibility to supervise the pets while using this cat wheel and use it at the owner's risk.

Regular maintenance and care for your sheel

Inspect cat wheel from time to time for damage, Do not use if damaged.

Inspect bolts and nuts from time to time to make sure ideal tightness of all bolts and nuts are maintained. Failure to meet the criterias above may result in a poorly working cat wheel which is potentially hazardous.

In the event that the cat wheel ceases to run as normal or failure of any part, please contact your Ferris cat wheel distributor for assistance. Any attempt to repair or adapt the cat wheel in any way will render your guarantee void.

Neither Ferris cat wheel nor its distributors will be held responsible for accidents involving cat wheels that have been alteled in anyway from the original design or attempts made to repair or adapt the wheel.

Operating limits

Not for cats or other pets with combined body weight of more than 35 lbs (15.87kg)
